1 You need six containers like these.

Find which containers hold

(a) less than $\frac{1}{2}$ litre

(b) about $\frac{1}{2}$ litre

(c) more than $\frac{1}{2}$ litre.

2 You need four tubs.

Measure into each tub the amount on its label.

3 You need three containers like these.

Estimate then measure how much each can hold.

- How many litres of water are used altogether by
(a) Jake and Alex (b) Alex and Kate (c) all 3 children?
- How many more litres of water are used by
(a) Kate than Alex (b) Alex than Jake (c) Kate than Jake?

- How can Elsie measure 3 litres of water into the basin?
Find three different ways.

The bubble bath machine holds 1 litre.
How many of these bottles can be filled?
(a) 100 millilitre bottles (b) 200 millilitre bottles

- Find the different ways in which 100 and 200 millilitre bottles can be filled.
